

Characteristic	Intended Use	Result ¹⁾
Water tightness	(A)	watertight
Water vapour diffusion resistance factor	(A)	$\mu \approx 875000$
Thickness of the waterproofing sheet material	(A)	0,4 mm
Width	(A)	100 mm
Mass per Unit	(A)	565 g/m ²
Assumed intended working life	(A)	25 years
Reaction to fire EN 13501-1	(A)	class E
Statement on dangerous substances	(A)	does not contain any
Crack bridging ability	(A)	1,5 mm
Bond strength	(A)	≥ 0.2 MPa
Joint bridging ability	(A)	watertight
Water tightness at sealing and around penetrations	(A)	watertight
Freeze / Thaw resistance	(A)	proved
Resistance to temperature	(A)	proved
Resistance to water	(A)	proved
Resistance to alkalinity	(A)	proved
Resistance to chlorine	(A)	proved
¹⁾ to be evaluated taking into account national requirements		

Schlüter-DITRA 25 Schlüter-Systems KG	Annex 1
System built up Watertight sheet in combination with covering tiles for wet areas under outdoor and indoor conditions
